

**as a user you can be a tenant or a landlord**

**the user, as a landlord, can:**

- add a property and can have many properties
- send reminders for the tenants (create a todo list for the tenant)
- generate a key for a property to give to the tenant
- remove tenants from a property
- reply to issues that tenants raised
- see a tenant profile
- change and see a property information
- can change and see his own information

**the user, as a tenant, can:**

- can join a property through the key sent by the landlord
- can raise an issue regarding to the property
- can leave a property
- can see information about the property and his landlord
- can see and change his own information
